DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Todoroki, JP 11-054593, wherein machine translation was used.

Todoroki teaches the following [0015]:

- A substrate treatment chamber (40);
- A substrate holder (20) that can be inserted in the chamber [0018];
 - Wherein the holder comprises multiple stages arranged vertically;
- A substrate transfer unit (30) that conveys the substrates into the holder;
- A sensing device (50) for sensing a holding condition of the substrates within the holder [0020-22];
- A control device (80) that –
 - (1) Senses the holding condition of the substrates by availing the sensing device [0025];
 - (2) Controls the transfer unit accordingly [0026, 0033-34].

Since the apparatus is capable of differentiating between normal and abnormal substrate holding conditions, the transfer unit is capable of removing either type (or both types) according to the objectives of the operator. Further, a recitation concerning the manner in which a claimed apparatus is to be employed does not differentiate the apparatus from prior art satisfying the claimed structural limitations (*Ex parte Masham*, 2 USPQ2d 1647).
